

The Zooming Camera Coupler

Features...

- 38mm ISO interface system – link to most microscopes
- 7:1 manual zooming capability – with optional detent
- Built in focusing module
- Right angle design for ergonomic and easy use
- Modular system specify Camera Tube and Camera Mount
- Secondary focusing adjustment on Camera Tubes

Microscopes compatability as below - please also see Flow PDF for further info

Use Directly with

- Nikon 38mm ISO inserts (most Nikon)
- Leica – Older models 38mm ISO

Use with DC Bottom Assemblies

- Leica with HC optics = "Y" Assembly
- Olympus AX, BX, BX2, CX, CX2 = "U" Assembly
- Zeiss with interface 60 or 60N = "Z" Assembly

Example Images

Taken on Canon 500D DSLR camera

Left Image taken at high mag Approx 128X

Right image taken at low Mag Approx 16X

Images achieved by focusing at high mag and zooming out – no refocusing took place between images only reduction in magnification and change of objective.
