## C/CS Camera Attachment Adaptor

If you purchase TS-HM-USB2 Camera Adaptor, you can attach C or CS mount Camera. It allows you to observe or save the image on the monitor or PC monitor. Or, you can also shoot with a smartphone by using a commercially available smartphone adapter for microscopes.

# Suitable for Inspection for Electric Parts, Circuit Board, Metal Work Surfaces, Printed Letters, etc.!

Assembly Image of Handy micrometer scope and Stand

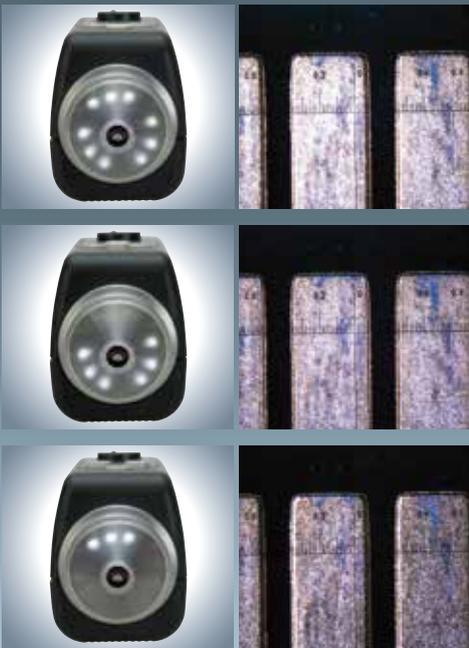

## Upright image allows you to observe object as loupe

When you use the microscope, image is flipped horizontally. However by using roof prism in optical system, you can observe samples by upright image. With this function, it allows you to control and observe object easier.

## LED Multi functioning Lighting System

Installing 9 pcs of white LEDs which are able to on and off at 3 sequence. You can also control the brightness. This light system allows you to observe object more stereoscopically.

Camera Stand  
TS-P22Z

## Precision Scale installed in Eyepiece Barrel

As scale is installed in eyepiece barrel, it will not bother 3-D object
