

POCKET MICROSCOPE

The birth of a convenient
portable mini scope

Variable magnification is possible, and it comes with LED illumination in a straight type, upright image.. Thanks to a special anti-reflective treatment, the image is gentle on the eyes and very clear. It's a pocket-sized scope that is easy to carry, and it comes with three interchangeable light diffusers as standard equipment.

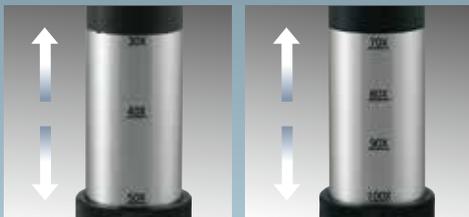

TS-SP-01/SCORPION-I

(30x~50x)

TS-SP-02/SCORPION-II

(70x~100x)

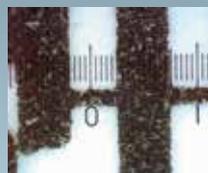

Simply move the barrel up and down
to change the magnification

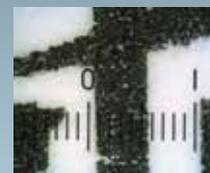

TS-SP-01 (30x~50x) TS-SP-02 (70x~100x)

Total length	Max 180.0mm
	Min 137.2mm
Diameter	Max 30.0mm
	Min 23.3mm
Weight	160g

Option: Scale

TS-SP-M1
(0.05mm)

TS-SP-M2
(0.1mm)

Accessories

8-Lamp high intensity
LED lighting

Eye cap
(Eye protection rubber)

Battery holder with
Light controller

Acrylic base for Replacement

This is equipped with a simple conical diffuser at the tip. It allows you to capture the workpiece at an angle and can create the appearance of objects floating

If using a C/CS mount camera, it can be easily mounted and observed on a monitor.

※ For CS mount, a 5mm thick adapter ring (TS-0104H) is required.
